

PUBLIC NOTICE

"Consumers Energy will be making improvements to the natural gas pipelines in the Schoolcraft area in the coming weeks to help ensure continued safe, reliable service for our customers. Construction at times may involve accessing residential properties and, in some cases, contacting homeowners to access gas meters that may be located indoors. Ahead of construction, we ask residents to flag outdoor sprinklers, lighting lines, dog fences, and drainage to ensure safe access and limited disruption. We understand this work may cause an inconvenience, but we appreciate customers patience as we perform these necessary upgrades. For more information customers can call (269) 337-2356."
